CONSOLIDATED SCHOOL

Focus on Growth

"Today we inspire the confidence to grow so that tomorrow is filled with endless possibilities"

Possibilities

Look for New Possibilities

Looking for the positive opportunities in all situations, even those that challenge the status quo, help us to embrace new ideas, new learning, different ideas, thinking and direction. Possibilities are sought by taking risks and embracing new opportunities, out of our comfort zone, in the pursuit of new learning and growth.

If you seek them out and embrace them, the possibilities are endless...!

Relationships

Relationships Underpin all we do

Relationships are about working together positively, focusing on open verbal and body language. It's about developing trust, respect and team work. Relationships are underpinned by nurturing, flexibility, understanding, valuing others, sharing, support and positive energy. These ensure a high level of staff wellbeing, which achieves ongoing growth for ourselves and others.

Space

Allow Space and Time

To allow each other the space to grow, we need to support each other to prioritise and lighten each others load. Taking time and space to think about challenges or issues, without the need for immediate resolution, helps us to come to positive outcomes and time to plan for every possibility. Space and time helps us to focus on our goals and allows us to pursue personal growth and reflect on our current practices.

Challenge

Seek Challenges

Through positive, supportive and respectful relationships, we embrace and seek challenges to promote continual growth within ourselves, our students and the broader community. In this, we seek to collaborate, encourage others, challenge our own thinking, understand intentions and give a positive attitude to change and learning.
